

We are happy to announce that in just two weeks, ZNAK will be presenting its latest innovative product—multilayer wallpaper—at the I Saloni Milano 2008 design fair, in Milan, Italy. The product was created in collaboration with popular Dutch conceptual artist Aldo Kroese (<http://aldorado.nl/>) and the Berlin design firm StudioHausen, rising stars in industrial design (<http://www.studiohausen.de/main.html>)

The prominent jury has commended our joint project and has included it in the "SaloneSatellite 2008" program. Therefore we invite you to the official presentation of our new product, on April 18, from 11 a.m. to 5 p.m., at the annual design fair I Saloni Milano, in Milan, Italy. The presentation will be held at the stand C11, Pavilion 28 at the Milan Fairgrounds in Rho.

At the presentation, guests will have the chance to meet the ZNAK creative team, and learn more about both our latest product and other products by ZNAK's artists.

We'll see you there! Sincerely, ZNAK.
